PERSONAL OBJECTIVE

My passion for electronics and computing began at a very young age. This led me to train as an Industrial Automation Superior Technician and later specialize in programming as a Web Developer. Although I have developed knowledge in both fields, my greatest interest in specializing lies in programming. My goals are to join a professional team to gain experience, apply my knowledge, and continue growing in the field of software development while continuing to expand my programming studies.

WORKING EXPERIENCE

Control Systems and Automation Software Developer

Proci, S.A. | December 2023 - December 2024
